Description:

Very disappointed. The only change from this edition from the previous one is the inclusion of a free book. Its just two model literature reviews printed. We dont need this kind of gimmick. We can find thousands of literature reviews online! I felt I insulted. I had looked forward to see more updates but was let down. It does not justify the \$60 price tag at all. The quality of the printing and organization of the book is so old fashioned and outmoded. The book should be charge at \$20. Please consider carefully before buying it. The knowledge is good but the changes in the different editions is very minimal. I remember reading the first edition. It had similar knowledge. I liked it very much but the author and publisher dont seem very genuine in improving the book. I feel that they just want to make money out of it. But not seriously interested in the pursuit of finding the best methods to do the literature review.
